

Extreme Fire Danger

Don't be responsible for starting a fire with your OHV. Spark arrestors and catalytic converters start fires too!

Statewide Fire Restrictions Now in effect for all lands in this state

Because of extremely dry conditions, state and federal officials established statewide fire restrictions. The order, effective immediately, includes all state, private, and federal lands. For more information, contact your local land management agency.

The following are prohibited:

Using open fires of any kind, except in improved campgrounds or picnic areas.

Smoking, except in vehicles, boats, developed recreating sites, residences, or areas cleared of flammable materials.

Using fireworks, tracer ammunition, or other pyrotechnic devices.

**Enjoy your stay, but remember to
leave a cold trail. Only you can
prevent wildfires.**
